

Litigation

When faced with the prospect of litigation, you have decisions to make. Our clients trust us to arm them with the information, options and recommendations needed to make sound decisions regarding the best possible strategy and outcome for that litigation. Then, after tasking us with achieving a desired goal, our clients know they can count on us to apply the talent, experience and relentless work ethic necessary to achieve that outcome.

We understand that our clients define “success” in litigation as meeting or exceeding expected results. For example, a client intent on resolving a claim quickly in order to focus on business pursuits might not view a trial victory following years of litigation (and the resulting legal bills) as a “success.” By the same token, a trial victory following hard-fought litigation may be exactly the outcome a client needs when faced with litigation initiated by a major competitor. The bottom line for our [team](#) of exceptional litigators is to achieve our clients’ goals in the most professional and effective manner possible.

While historically recognized as a leader in the area of Employment Defense Litigation, we carefully developed a strong and deep litigation practice through the addition of high caliber practitioners in all aspects of business, commercial and corporate litigation, and represent clients in the following specific areas of law:
